

Mechelen, March 27, 2012

**To whom it may concern,**

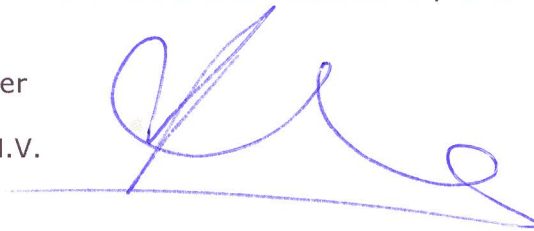

After the successful completion of the integration of our IKANALM product with the SAP environment, done by CSDC Ltd., and the certification of the product – IKANALM – by SAP AG in Walldorf, we ordered from CSDC also support and a number of enhancements.

We also have established a demo installation in Sofia, whereby CSDC has ordered, delivered, and installed all necessary software and equipment, including a Dell Power Edge T310 Server, on our behalf.

During our collaboration, CSDC has proven themselves not only as highly valuable software developer, but as efficient hardware suppliers as well. Being responsible for both software development, and hardware supply, they have significantly shortened, simplified, and made far more reliable the implementation of this complex project.

Therefore, I can recommend CSDC as a reliable and professional software services and hardware supplier.
