REFERENCE LETTER

To whom it may concern,

Relaying upon the long years of collaboration with CSDC, two years ago we have started with them an integration project of a non-SAP ALM system with the SAP environment. The purpose of the project was our product IKANALM – a comprehensive application lifecycle management tool – to be closely integrated with the SAP systems.

As from the beginning, CSDC experts have shown profound knowledge of the SAP environment, and due to them the integration was planned in the most effective way, and entirely conforming with both SAP requirements, and ALM principles. During the project implementation by the CSDC SAP team, the organization and the infrastructure CSDC had built were of extreme importance for the result achieved – perfect realization exactly meeting the deadline. Immediately after finishing the implementation, the product was certified by SAP AG in Walldorf; the certification passed fast and smoothly, without any remark from SAP AG.

Our collaboration with CSDC continues further – they are engaged with the support and developing enhancements of the product.

With this letter I am strongly recommending the experts of CSDC as highly valuable partners in the area of SAP consulting, from specifying the requirements and defining the system architecture to its implementation and development.

René De Vleeschauwer
Managing Director
IKAN Development N.V.
